

## 8 USING AN SD CARD

### Backing up the data saved on the SD card onto a PC (Continued)

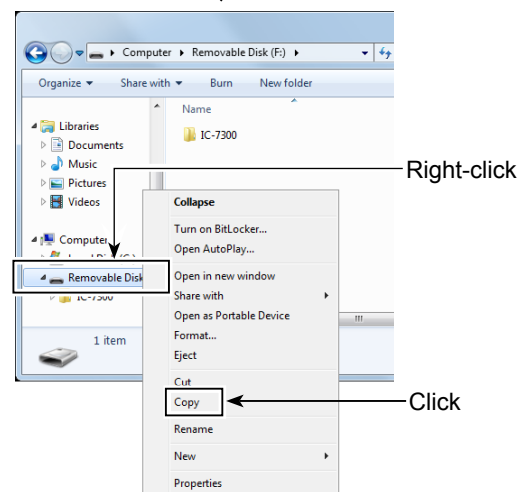

#### ◆ Making a backup file on your PC

Windows 7 is used for these instructions.

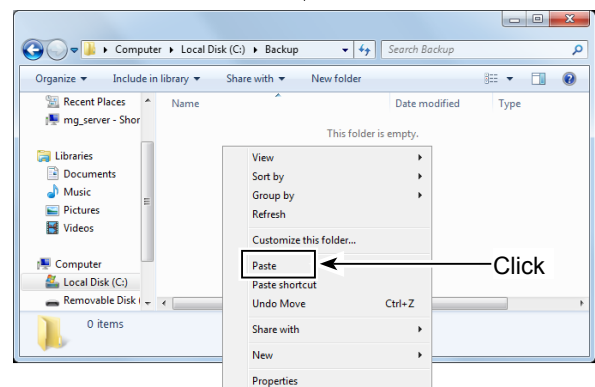

1. Insert the SD card into the SD card drive or a memory card reader\* on your PC.  
\*User supplied.
2. The “AutoPlay” screen is displayed, as shown to the right.  
Click “Open folder to view files.”  
• Displays the IC-7300 folder.

3. Right-click “Removable Disk,” and then click “Copy.”

4. Open the desired folder to make a backup file, and then, right-click on the folder.  
Then, click “Paste.”  
• Pastes the copied SD card data onto the hard disk.  
(Example: Pasting into the “Backup” folder in the C drive)

5. When removing the SD card from your PC, be sure to safely remove it.  
①The screen shot shows when a memory card reader is inserted.
6. After “Safe To Remove Hardware” is displayed, remove the SD card from your PC.
