

Playing back a QSO audio

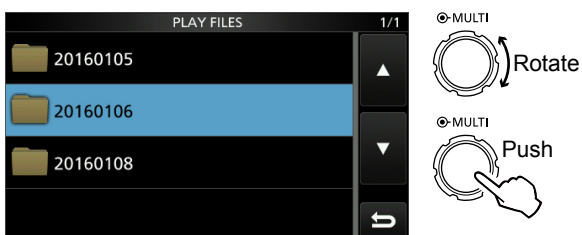

You can playback the recorded QSO audio.

1. Open the PLAY FILES screen.

MENU » **RECORD > Play Files**

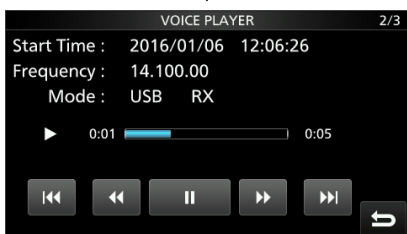

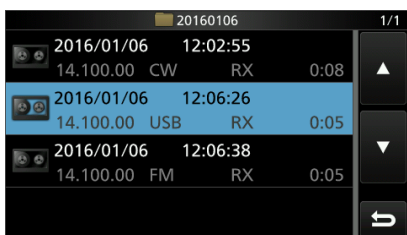

• The folder list is displayed.

2. Select a folder that contains the file you want to playback.

• The file list is displayed.

3. Select the desired file.

• Starts a playback.

① Playback continues to the next file, and stops when the last file in the folder is played back.

4. To close the PLAY FILES screen, push **EXIT** several times.

Operation while playing back

You can fast forward or rewind while playing back.

You can change the skip time in the PLAYER SET screen. (Default: 10 seconds)

MENU » **RECORD > Player Set > Skip Time**

◇ Fast forward while playing

Touch **FF** to fast forward to the skip time point. (Default: 10 seconds)

◇ Rewind while playing

Touch **REW** to rewind to the skip time point. (Default: 10 seconds)

① If you touch **REW** within the first 1 second of the file, at the end of the previously recorded file will play back.

◇ Pause while playing

Touch **PAUSE**.

① **PAUSE** is displayed while pausing.

① To cancel the pausing, touch **PAUSE**.

◇ Playing the previous file

Touch **PREV** to play the previous file.

① If there are other files in the folder, while the oldest file is playing back, touch **PREV** to start playing the beginning of the file.

◇ Playing the next file

Touch **NEXT** to play the next file.

① If there are other files in the folder, while the most recent file is playing back, touch **NEXT** to stop the playback.

◇ Moving to the beginning of the previous file

• While paused, touch **PREV** to move to the beginning of the previous file.

① To playback the file, touch **PAUSE**.

• While paused, touch **REW** to return to the beginning of the file.

① To playback the file, touch **PAUSE**.

◇ Moving to the beginning of the next file

While paused, touch **NEXT** to move to the beginning of the next file.

① To playback the file, touch **PAUSE**.
